

MicroMentor.

— A LEARNING APP FOR STUDENTS

**Turn a whole lecture into 3 minute lessons
you actually remember.**

A student micro-learning app that beats cramming and the forgetting curve. Built on the AMPLIFY model.

We cram. Then we forget.

- Lectures dump everything at once. Working memory overloads.
- Without review, we forget most of it within days (Ebbinghaus, 1885).
- So we cram. High stress, and it fades right after.

50-80% forgotten within days

Meet MicroMentor.

MicroMentor turns your lecture notes into short, personalised lessons, with quizzes and spaced reminders so it sticks.

- **3 to 5 minute lessons.** One idea at a time, on your phone.
- **Smart review.** Reminds you right before you would forget.
- **Learn together.** A class leaderboard and a Q and A wall.

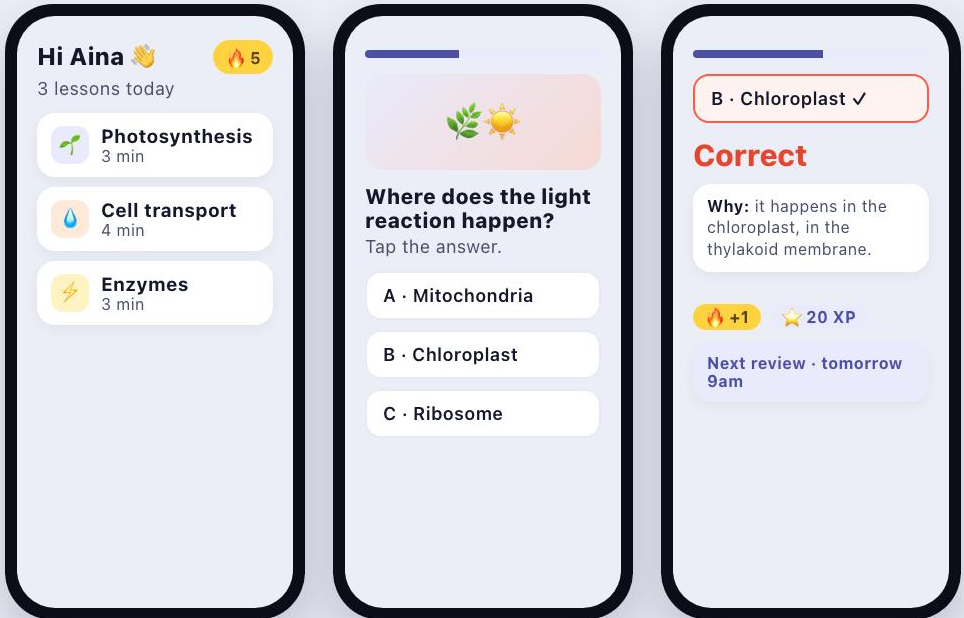

Built on AMPLIFY

A microlearning model by Nurul Fitriah Alias (UM, 2024). Its seven components became our seven design decisions.

1	Clear learning objectives	One goal per lesson
2	Personalised content	Course and weak spots
3	Continuous feedback	Instant, spaced review
4	Efficient content delivery	Short, mobile, offline
5	Interactive experiences	Tap, drag, scenarios
6	Social interaction	Leaderboard, Q and A
7	Seamless curriculum integration	Mapped to syllabus

Seven screens, one calm loop

The full seven screen prototype is built in Figma. Home, Lesson and Feedback shown.

Aina's story in six frames

1 The problem

120 slides the night before her exam.
Panic.

2 Discovery

She opens MicroMentor. Three short lessons today.

3 Learning

A three minute lesson, one goal, tap to answer.

4 Feedback

Instant tick and a reason. It returns tomorrow.

5 Together

She checks the leaderboard and asks on the wall.

6 Outcome

Exam week. Calm, confident, and she remembers.

— WE TESTED, THEN CHANGED

No reason given for a wrong answer

Added a one line why

Making a lesson took too long

Six steps down to three

Leaderboard felt stressful

Opt in and class only

Timeline and the plan

Wk 1-4
Research

Wk 5-7
Ideate, Assign 1

Wk 8-9
Prototype

Wk 10-11
Test

Wk 12-14
Assign 2

Sustainability

Free tools only, like Figma and Canva.
No cost to the course, and no printed notes.

Commercialisation

Freemium, with ready made lesson packs.
Bilingual in BM and English.

WHERE IT IS HEADING

AI turns any PDF of notes into lessons in minutes. It lives inside WhatsApp and Teams, with badges that follow you between courses.

Terima kasih.

Creativity works best when it is aimed at a real problem, and structured by a sound model.
